

Scout Flash – Software Release Rev 1.0.03. October 7, 2020 9:45:16 Checksum: 0x71BD

New Features:

Wireless retransmission increased for large setups with multiple devices.

Optimized Charging performance.

Bug fixes:

None.

New Features:

Wireless Auto-detect ID: An option (enabled by default) to negotiate wireless ID's to guarantee they are unique. It can still be overridden manually which will disable the "Auto-Detect" feature.

Bug fixes:

The flash would incorrectly respond to the "detected" signal from sensors.
