Connection Diagram

4m Scout Cable
Included

Coiled 3.5mm Shutter Cable
(Included)

Use camera to control
Flash(es)

Getting Started:

1. Remove 4 phillips screws from the bottom of both the transmitter and receiver. Install 6 AA batteries in each.
2. Power on both the Scout Transmitter and Receiver.
3. Turn on LED Alignment - Press enter, then enter again.
4. Face the transmitter and receiver towards each other. When they are aligned the Receiver LED will flash Red.
5. The LED will turn green when the beam is interrupted and LED Alignment is on. If LED Alignment is off the LED will turn red on trigger.
6. Connect your camera as shown above.

There are many other settings and modes you can use. Be sure to check out the owner's manual for more details. As always, please let us know if you have any questions. We're glad to help!
